Tanner Leigh

Santa Monica, CA | Tannerhleigh@gmail.com | **tannerhleigh.com**

Summary

I am a front-end software engineer with an immeasurable passion for cultivating relationships and seeing the best in every moment. Having a background in film and graphic design, I know how to structure code and create content that is not only consumable but beautiful with the functionality to back.

Projects

- ❖ **Affirmations** - A suicide awareness resource made using React, Auth, and MongoDB.
- ❖ **Upnext** - A sneaker release tracker and database using Node.js and Express.
- ❖ **The Big Mac Project** - A data visualization tool that compares the prices of every Big Mac in every major city across the US by using React, MongoDB, and Selenium.

Experience

July 2020 - October 2020
General Assembly - *Software Engineering Fellow*

- ❖ Participated in a full-time Software Engineering Bootcamp, completing in-class projects, hackathons, and personal projects.

November 2019 - July 2020
Character Media - *Creative Producer and Editor*

- ❖ Utilized Adobe Premiere and After Effects to produce and edit over 40 videos for Character Media's website and Youtube for millions of active viewers.

September 2019 - November 2019
CoEfficient Labs - *Jr. Creative Designer and Editor*

- ❖ Collaborated with the Creative Director to produce, direct, and edit advertisements for companies such as TapCart, Blacklane, and Verb.
- ❖ Slashed production and editing times by 25% by introducing Asana and storyboarding into the production team's workflow.

Education

September 2015 - June 2019
University of California, Santa Cruz - *Film and Digital Media*

Skills

React, JavaScript, HTML, CSS, MongoDB, PSQL, Python, Django, Adobe Creative Suite
